

I am a cross country truck driver. Satellite radio is one of the best things to happen for truck drivers in a long time. We can listen to radio without having to constantly search for channels. The weather and traffic reports on XM Radio are a great service. I can select any major city and find out the weather and traffic situations. That allows me to pre-plan and choose options to travel situations. That helps me to be more productive and above all SAFER. Please don't be persuaded to take satellite radio away from us. Thank You
James Wilson
